Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4, 9-11, 13, 15 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Tzeng I6,471,056). Tzeng discloses a cover (3) for use with a remote control device comprising a front member having a continuously flat surface, a rear member integrally formed with the front member at a plurality of rounded surfaces (four corners) to form an enclosure (see below), and an orifice (311) formed in the rear member for enabling a remote control device to be inserted into and removed from the enclosure. The front member, the rear member and the rounded surfaces comprise of a flexible, stretchable and transparent material such as PVC for conforming to the shape of the remote control device and for providing a sanitation barrier. As to claim 13, the rear member of Tzeng comprises a converging surface including a first slanted surface (on one side along the center of the rear member) and a second slanted surface (opposite side of the first slanted surface).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 3, 5-8, 12, 14 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tzeng (6,471,056) in view of King (4,901,852) and Derr et al. (6,634,494; hereinafter

Art Unit: 3728

Derr'494). Tzeng discloses the cover as above having all the limitations of the claims except for the cover being formed from a polyurethane compound or latex or rubber or silicon or styrenic elastomer as recited in claims 2-8. King teaches a protective cover for a pager formed from a film of transparent stretchable plastic such as silicon plastic. Derr'494 shows a protective cover for holding a device and the cover formed from a transparent soft PVC or elastomers or polyurethane. It would have been obvious to one having ordinary skill in the art at the time the invention was made in view of King and Derr'494 to modify the cover of Tzeng so the cover is comprised of polyurethane or latex or rubber or silicon or styrenic elastomer as recited in claims 2-8 since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.

In re Leshin, 125 USPQ 416.
